

Student Nurse Extern Program

Penn Medicine Lancaster General Health is dedicated to providing a supportive and collaborative environment to help nursing students enhance their clinical knowledge and help prepare them for their future transition from student to novice nurse. The Student Nurse Extern Program enhances a student’s clinical experience and provides the unique opportunity to utilize clinical assessment and patient care skills the student has gained thus far in their nursing education. The externship is an 8 ½ week full-time summer program, begins at the end of May, and ends in late July.

Qualifications – Summer 2022 Program

- Current nursing student enrolled in a BSN program
- Minimum GPA of 3.0
- Completion of at least one nursing clinical rotation in an acute care setting

Description:

For the full-time summer program, the Student Nurse Extern (SNE) will be assigned to Registered Nurse preceptors in two different nursing units (4-week rotations) and benefit from their clinical expertise. The SNE will have the opportunity to observe diagnostic and therapeutic procedures, as well as learn how ancillary departments work with nursing to provide quality care to each patient. This experience will give the SNE the opportunity to oversee a patient assignment, perform basic nursing procedures, and observe and assist the Registered Nurse with advanced procedures. For those who would be interested in continuing to build on their nursing skills, an additional winter clinical rotation will be offered during winter break from nursing school.
